

If we don't have projects ready to review for application by October we can apply again after the October grant is closed out. Current grant must be closed out before applying for another round.

We should meet again with Kelly near the end of September to go over our proposed projects and their value for grants. We may want to propose projects greater than \$200k and thin them down during discussion.

Karen Chapman. MRPC, will put together the application while we supply her with the project information.

We should have everyone involved in the process on a group call for projects. ECI, Unutil, N Grid, EAC, Karen Chapman, School Maintenance, etc.

Kelly noted that new hybrid police interceptors have been available since 2019 and there is a grant for \$5000 toward the purchase. There are a couple of communities who have bought them and offered reviews. Basically, those departments who have purchased them like them/ have no issues.

Next steps:

- Have Kevin send the ECI lighting proposal to Karen asap.
- Get priced proposals for HVAC work, town hall and school.

-Other business

None.

-Agenda for next Meeting:

-Next meeting date TBD

Respectfully submitted by Kerry Koskinen, Secretary.
